Introduction to the Certificate Course

Maritime law impacts everyday life as 90% and more of total trade and commerce in volume depends on it and yet as a sector it remains invisible. In a globalized world it is impossible for a country to operate in isolation. It is a less known fact about the shipping industry that a ship can be operated from one country, flagged for operational reasons to another and then has crew from yet another nation. Increasing mobility in the maritime space leads to various scenarios, such as ship arrests and cargo claims, providing excellent opportunities for experts in maritime law. This mobility primarily serves security, defence, and commercial purposes. However, the rules, regulations, and laws governing the maritime sector regulate mobility, exploration, and all other human-induced activities in the world's oceans.

The Certificate course is aimed to cover wide range of areas related to maritime law including Ocean Governance, Marine Environment, Admiralty Law and Carriage of Goods by Sea. This training programme is designed to introduce maritime sector in its entirety to our audience.
